

**FOR IMMEDIATE RELEASE**

## **3BView Surveys the Legal Market on Mobile Device Usage and Document Security**

*Survey will be used to better understand the use of devices such as Blackberry, iPhone, PDAs, and Netbooks among attorneys*

**ST. HELENS, U.K. – September 30, 2009** — 3BView, a global leader in metadata removal, today announced they will be conducting a survey aimed at attorneys to better understand how mobile devices are being used in their day-to-day practice.

“We are seeing a significant increase in the use of business applications via mobile devices by attorneys,” says Cathy Brode, Founder and Vice President of Product Marketing at 3BView. “Our goal with this survey is to better understand the way these devices are being used, so we can ensure the attorneys who are using them are not putting their data or their practices at risk.”

The sophistication of today’s mobile devices such as Blackberry, iPhone, PDAs and Netbooks now presents a practical and cost-effective alternative to laptops. Leading mobile devices can access internal systems and business applications, and enable the review, edit, and forwarding of documents. This survey is focused on understanding how these business applications and these devices are being used.

The survey is available for all legal practitioners. They can access the survey at <http://www.zoomerang.com/Survey/?p=WEB229PNSVQD9C> through October 23, 2009. All participants will be entered into a drawing to win an upgraded phone of their choice – either a Blackberry Storm 9530 or an iPhone 3GS 32GB. Results will be available after the survey has concluded to all participants who request final results.

### **About 3BView**

3BView is a global leader in metadata removal across multiple device types and access methods, enabling enterprises and government agencies to secure their documents, avoid commercial and reputational risks, and comply with regulatory requirements.
